Setting Up A Bitnami LAMP Stack

Multiple Apps or Domains

Copy the Demo Folder structure to the /apps folder

```
sudo cp -r /opt/bitnami/docs/demo /opt/bitnami/apps
```

Change Ownership of Demo Folder

```
sudo chown -R bitnami: /opt/bitnami/apps/demo
```

Change Path of Application

Edit

`/home/bitnami/apps/demo/conf/httpd-prefix.conf`

As needed. Then add:

`Include "/opt/bitnami/apps/demo/conf/httpd-prefix.conf"`

To

`/home/bitnami/stack/apache2/conf/bitnami/bitnami-apps-prefix.conf`

Add Sub-domain or Domain

Edit

`/home/bitnami/apps/demo/conf/httpd-vhosts.conf`

As needed. Then add:

`Include "/opt/bitnami/apps/demo/conf/httpd-vhosts.conf"`

To

`/home/bitnami/stack/apache2/conf/bitnami/bitnami-apps-vhosts.conf`
